KEY FEATURES IMPLEMENTED

- Task Management:** Create, edit, toggle completed, and delete tasks in real time.
- Category Tags:** Organize tasks under Work, Personal, Study, Health, or General.
- Live Search:** Instant text search across all task titles and category tags.
- Sorting Controls:** Sort by date created, deadline, priority, or alphabetical order.
- JSON Data Backup:** One-click export and import functionality to backup local data.
- Priority Levels:** Categorize urgency using High, Medium, and Low priority badges.
- Due Dates & Alerts:** Track deadlines with Overdue, Due Today, and date badges.
- Status Filtering:** Segment views effortlessly by All, Pending, and Completed.
- Live Progress Bar:** Visual percentage completion bar and real-time statistics counter.
- Theme Switcher:** Clean Slate Dark mode and Light mode with LocalStorage persistence.

TECHNOLOGY STACK

Technology	Role in Project
HTML5	Semantic structure, accessible form controls, and inline vector SVGs
CSS3	Design tokens, dark/light themes, flexbox/grid layout, and responsive styles
JavaScript (ES6)	Modular state management, DOM rendering, modal handling, and LocalStorage persistence
